

# The Coleman Journal

Most Effective Advertising Medium reaching the People of Town and District. The Journal goes into the Homes.

Volume 24, No. 15.

THE JOURNAL, COLEMAN, ALBERTA THURSDAY, AUGUST 23 1945. \$2.00 Per Year; Single Copy 5c.

## Coleman To Organize Committee to Aid National Clothing Drive to Aid Destitute Europeans

Maurice Cooke Has Been Appointed Temporary Chairman; Public Meetings to be Held in Near Future.

Coleman is going to swing into line along with other cities and towns throughout the Dominion and play its full share in collecting used clothing with which to help clothe helpless Europeans who face a hard winter through lack of insufficient clothing and food.

Maurice Cooke has been appointed temporary chairman of the local committee and is busy at the present time making preliminary arrangements to organize a public meeting and drafting a plan to place before the meeting for the citizens' approval.

A circular letter is being drafted and will be sent to all Coleman organizations giving time and place of a meeting and asking that each organization send at least two delegates. In addition all public-spirited citizens are asked to be present and take an active part in formulating the committee's plans for a clothing drive in Coleman. Date and place of the meeting will be announced probably next week.

In order that citizens may have a better idea of what this national clothing drive is all about The Journal publishes the following information which has been received from national headquarters at Ottawa:

What is the national clothing collection? The national clothing collection is a united effort on the part of the Canadian United Allied Relief Fund and UNRRA (United Nations Relief and Rehabilitation Administration) with the assistance of national, provincial and local organizations throughout Canada. The purpose of the collection is to secure used clothing for free distribution to needy and destitute children, men and women in war-devastated countries.

What is the CUARF? CUARF (Canadian United Allied Relief Fund) which sponsors this drive, is the co-ordinating body of the following relief societies: Belgian War Relief Fund, Canada-France Relations Committee, Canadian Aid to Russia Fund, Canadian Friends of Luxembourg, Chinese War Relief Fund, Czechoslovak War Charities

## AC1 A. Read And Tpr. E. Snowdon Return Home

Two more Coleman young men have returned from overseas during the past week. They are Trooper E. D. Snowdon, who has been overseas during the past two years. He saw action in France, Belgium, Holland and finally Germany as a member of a Canadian tank corps. He had signed for the Pacific theatre and is now awaiting further orders.

The second young man is AC1 Alfred Read, son of Mr. and Mrs. W. E. Read. He was with the RCAF and reached Britain last year after training in various bases in the Dominion. He, too, had signed for the Pacific, but now that the Japs have surrendered, he is awaiting further orders from his officers.

## Inspection Of Central School Invited

The Board of Trustees wish to invite any ratepayer of the Town of Coleman and School District 1216 to inspect the Central School which is in a highly commendable state of cleanliness and sanitation after being cleaned by the lady janitors and the two newly acquired janitors.

Board of Trustees

## TO BLOOD DONORS OF ALBERTA

With the war at an end, our efforts are still needed. The Blood Donor Clinics will be continued, and their continuance is definitely associated with your voluntary effort of giving blood. The Red Cross hopes that donations will continue on the same scale as in the past so that there will be an adequate supply to be used in our military hospitals at any time, as this material is a vital factor in restoring our wounded men's health when they are forced to undergo an operation. The Red Cross wishes to thank you for your past efforts and know that you will not fail to continue.—Dr. R. C. Riley, provincial chairman, Red Cross Blood Donor Clinics.

## Municipal Hospital Board Changes Site

Original Site Not Obtainable; New Site Located Just East of Crows' Nest River.

Apparently unable to obtain the hospital site voted upon in the plebiscite of Dec. 16, 1944, which is located immediately west of the Oliver Dairy, the Crows' Nest Pass Municipal Hospital Board in session on Monday evening chose an alternative site in order that progress might be made towards the construction of the new municipal hospital, which is now some months behind schedule.

The new site is just a stone's throw from the Sartorius mill west of Blairmore. The site itself is across the number 3 highway bridge on the west, Crows' Nest river on the north, number 3 highway on the south and Carbon Avenue on the east, and incorporates about four acres of land.

The site has been promised by West Canadian Collieries, who own the land. Once the site has been officially granted the Board it will be submitted to Hon. W. W. Cross for his approval.

## MASS MEETING IN COLEMAN

Upon hearing of the change in the hospital site a mass meeting of all mineworkers was called by the local miners' union to be held in the Community hall next Sunday afternoon at 1 o'clock. At this meeting it is planned to review the entire municipal hospital situation and come to some final decision regarding Coleman's attitude in the entire affair.

## Jim Anderson Arrived Home This Week

SQMS Jim Anderson arrived home this week after having arrived in Canada on the "Duchess of Richmond." Jim is at present residing with his wife and family at Blairmore.

His parents, Mr. and Mrs. John Anderson, reside here. He was a miner in McGillivray before enlistment with the Southern Alberta Regiment in June, 1940. He trained for some time in Petawawa and at the west coast. He went overseas on May 2, 1942, and has seen action with the Canadian army in Europe.

## HEAVY FROST INJURED GARDENS

On Monday morning local gardeners rose to see a heavy frost playing havoc with delicate flower plants. The dahlias especially were hard hit and many gardens were completely wiped out of this beautiful flower. Another plant that suffered damage was the Glad, although apparently not to the same degree as the dahlias.

## MR. AND MRS. GEORGE SNOAD TO MANAGE HOTEL AT COALDALE

Mr. and Mrs. George Snoad have taken over the management of the Coaldale hotel, near Lethbridge.

Mr. Snoad left two weeks ago to take over the hotel and will be followed at the end of the month by Mrs. Snoad and daughter, George. He has been in Coleman many years, his parents residing here at one time and he received his schooling at the local schools. He has been employed for a number of years at the coke ovens.

Their home has been purchased by Mr. and Mrs. G. Hoyle.

Their many Coleman friends wish them luck in their new business venture.

## Harry Boulton Warns Against Fire Hazards

Forest Fire Raging in Flathead; Forests Now Dangerously Dry and Frequenters Are Asked to Exercise Care With Fires.

Fire Ranger Harry Boulton is viewing with alarm the dangerously dry situation that exists in the Pass forests at the present time. It is approximately a month and a half since any worthwhile rain has fallen and the forests are now tinder dry.

The Pass area is filled with smoke these past few days from the forest fire at present raging in the Flathead country. On Monday evening the smoke resembled a fog and blotted out familiar landmarks. The moon shone with a reddish tinge.

Harry and his assistants are watching closely the BC fire that is creeping towards the provincial boundary. In order that the fire danger is not enhanced he warns all fishermen, campers and any others that frequent the Crows' Nest Pass forest areas to exercise the greatest care with fires. All fires should be thoroughly drenched before being left so that the hot sun and a slight breeze will be unable to fan the embers back to life and thus set off a fire which may result in untold damage and the expenditure of thousands of dollars to fight.

## Coleman To Have Sunday Gasoline Sales

Local Garages Agree to Have One Garage Open Each Sunday; Hours of Sale Listed.

At a recent meeting of Coleman garage and service station owners a plan was drafted whereby Coleman motorists would be assured of Sunday gasoline sales.

It was agreed that on week-days, Monday to Friday, garages and service stations would sell gasoline from 7 a.m. to 7 p.m. On Saturday the hours of sale would be from 7 a.m. to 9 p.m., and on Sundays one garage would be open to sell gas from 8 a.m. to 6 p.m. All holidays would be classified as a Sunday and one garage would be open from 8 a.m. to 6 p.m.

Here is the schedule agreed upon for Sundays: On Aug. 26, White Rose Service Station will be open; on Sept. 2, Coleman Motors will be open; on Sept. 9, The Motordrome will be open, and on Sept. 16, Sentinel Motors will be open. White Rose Service Station will again come into the picture on Sept. 23, the rest following in turn.

Nursing Sister Mary Ondrus, CWAC, Vancouver, has returned to her base after coming here to attend the funeral of her grandmother, Mrs. Julia Kapalka. Miss Julia Ondrus, Trans Canada Airlines, Montreal, also came from the Quebec city to attend her grandmother's funeral. Mr. Steve Ondrus, who had been attending summer school, returned home for the funeral.

## Gave Delightful Recital Wednesday Evening

On Wednesday night, to a packed house, Natalie Minunzie, 17-years-old mezzo-soprano of Blairmore, sang a selection of English, French and Italian airs. John Goss, baritone, assisted, giving music lovers of the Pass famous sea shanties and ballads. Miss Pearl Kerr accompanied. Mr. Donald Graham, of Coleman, assisted in the program.

Miss Minunzie, on this her first public appearance in her home town since studying at Vancouver, showed exceptional qualities and there is no doubt that she will travel far in the musical world.

## Two Retirements And Three New School Appointments

Teachers Miss Virginia Janostak and Miss Reta Ash Retire From Public School Staff.

At a recent meeting of the school board two resignations were received from the public school staff. Miss Virginia Janostak, who has been on the staff for the past three years, has decided to study x-ray and will leave shortly for Spokane where she will take a course in x-ray.

Miss Reta Ash resigned to allow her to enter Alberta university where she will study for her B.A. degree and thus qualify as a high school teacher.

New appointments to the school staff are those of Miss Winnifred McIntyre and Miss Edna Morris, former pupils of the local school, and also that of Mrs. Annie McLean. The latter was formerly on the staff and will be remembered as Miss Annie Foster.

Mr. and Mrs. John Ramsay left at the week end for Calgary, where they will spend a week's vacation.

Mr. and Mrs. Martin Lusica and family, of the Lime Kiln, Mr. and Mrs. Joe Janostak and family and Mr. and Mrs. George Bielech and family recently visited at Manville, Alberta, where they were the guests of relatives.

## HOUSE FOR SALE

5 Rooms, also pantry and bathroom, located on 4th street. Terms needed. Also one corner lot on 5th street. Cash or terms. Apply to Joe Stephenson, Sentinel Gas Station.

## Salvation Army's Nation'l Campaign Starts Sept. 10

Mack Stigler is Again Coleman's Campaign Chairman; Dominion Objective is \$1,500,000.

The Salvation Army National Home Front Appeal for funds starts its national campaign on Monday, September 10. This year the Dominion's objective is \$1,500,000. Coleman's objective has not yet been announced by Capt. Smith, but it is presumed it will be the same as in former years, \$500.

Mack Stigler has once again been appointed the local campaign chairman. Captain Smith is choosing the local committee from among a number of prominent and community active citizens and will have his committee completed by the end of the week.

The principal slogan in this year's campaign to raise \$1,500,000 in Canada for the work of the next 12 months is "Making Better People for a Better World." The Salvation Army's greatest aim since it was founded in 1865 has been to make better people and it sought out people who needed its help and helped them. The Army has made better people of millions who have come in touch with it. The need for The Army's work is as great today. As one who has seen the operation of The Salvation Army in two wars and on the home front, we cannot ask too strongly for public support in this urgent and most important campaign.

## Drinking Water Supply Impure

All water consumers within the Town of Coleman are warned to boil all water for drinking purposes as the latest analysis shows it to be impure in its present state.

G. Lees, Secretary

# It's Cooling "SALADA" ICED TEA Reconstruction in England

MUCH HAS ALREADY BEEN TOLD of the sacrifices made by the people of Britain towards the winning of the war, but now that the tremendous task of reconstruction is about to commence, still more is being learned of the extent to which the civilian population shared in bringing about the defeat of Germany. While the populated districts suffered heavily from air attack, the people of rural England gave up their land, and in many cases, their homes, to provide space for the great number of airfields and the extensive training grounds required to launch the successful invasion of the continent of Europe. Miles of concrete runways are now being removed from wartime airfields and much of the material will be used for the construction of new highways. It has been estimated that sufficient concrete was used for air bases, to build a road thirty feet wide from Moscow to Chicago.

## Conditions To Be Improved

In addition to the concrete covered airfields, many temporary airfields were built for "D-Day" operations, and on these, which were mostly located on farmlands, all the topsoil was removed. This topsoil is now being replaced, under the direction of the Government, and the Government is also undertaking to replace all farm homes and buildings which had to be destroyed. There are indications that the sacrifice and inconvenience suffered by the farmers in giving up their land for military purposes may prove to bring them many advantages in the future, for the new homes and buildings are to be of the most modern construction, and a large number of farms will be equipped to operate completely by electricity. Farmers are also agreeing to settle all disputes in regard to boundaries at this time, and to work together to improve living and working conditions on the land.

## Tribute Paid By Americans

In some instances, whole communities in rural areas had to be moved in order to make room for manoeuvres of troops in preparation for the invasion of Europe. In the southwest of England, it was found that the coastline was very similar to that of the invasion coast of France, and for that reason large sections of the district were taken over to be used for the pre-invasion training of American forces. Recently a memorial shaft was unveiled by a general of the American army, in tribute to the people who had given up their land and their homes to make possible the success of the "D-Day" operations. These communities are now being re-established and new homes are being built to replace those which had to be destroyed, but these and many other communities of rural England will long be remembered for their important contribution to victory in Europe.

**INSIDE INFORMATION**—Innermost secrets of plant life are exposed by the penetrating eye of the modern X-ray. These weird shapes are not onions nor electric light-bulbs but a radiograph picture revealing why rounded swellings are seen so commonly on the stem of the Canada Goldenrod. The foe of hay-fever sufferers, this plant gets this goiter because a plump, yellow maggot lays its eggs on the stems of the goldenrod. Closer inspection of the picture will show the insects and their tunnelled exits.

Once almost exclusively used in dental castings are radiographed to medicine, x-rays are now called upon to detect cracks, porosity, gas pockets and other faults.

An important factor in making flying safe is the x-ray examination of aircraft parts before assembly. Golf balls have been x-rayed by professional players to make sure the hard oranges and grapefruit before they rubber cores were well and truly centred. Veterinary science calls the x-ray into service in greater degree each year.

Inventor Wilhelm Conrad Roentgen's original little tube and coil have evolved into massive machines, some of them capable of delivering a million volts or more. Great strides have been made from the days of the old glass plate to today's high speed film, such as the modern x-ray safety film. In its search for inside info, the x-ray is practically unlimited.

## John Paul Jones

### Baptismal Font Is Unveiled In A Church In Scotland

A baptismal font presented by the officers and men of the United States Navy in memory of John Paul Jones, the Kirkcubrightshire man who is regarded as the founder of the U.S. Navy, was unveiled in Kirkcubright Church, Jones was born on July 6, 1747, at Arbigland, Kirkcubright, where his father was head gardener to Mr. Craik, the owner of the estate. He was christened in Kirkcubright Church. The font, which is of Portland stone, is the work of George Henry Paul, London sculptor.—Edinburgh Scotsman.

Amsterdam has been a prominent diamond centre since the 16th century.

## Program Clinics

### To Investigate Radio Offerings To Western Canadians

Radio "program clinics" to investigate and rate programs offered to western Canadians will be set up in the near future, it was decided at the closing session of the Western Association of Broadcasters' annual conference at Calgary.

The "clinics" would decide on possible improvements and these would be submitted in a report to be submitted to the national association. Broadcasters also decided to recommend to their national headquarters that a man be appointed to "sell the media" of radio broadcasting to the Canadian public.

Weeds rob plants of water, food space and light.

## Price Control And Rationing Information

Q.—My husband will be discharged from the army shortly. Will he be issued preserves coupons for sugar for canning?

A.—Yes. If your husband is discharged, and applies for a ration book before October 31st, 1945, twenty additional preserves coupons will be issued to him in his ration book five. These may be used to purchase sugar for canning, half a pound for each preserves coupon.

Q.—Must butchers still display in their shops charts showing the various cuts and prices of the meats sold?

A.—Butchers are still required to post charts in their shops which give the cuts of meats and the selling prices they may charge for the various cuts. If your butcher has not got these charts in a convenient location for his customers' information, you should report the matter to the nearest office of the Prices Board.

Q.—I went into a store the other day to buy lard and the grocer said I could have only one pound. Why did he only allow me one pound?

A.—Your grocer has a right to sell as much or little of any unrationed commodity as he likes. In this case he was being wise. When supplies of most kinds are limited, grocers are wise to limit the amount sold to any one customer. In this way hoarding is avoided and there is an adequate supply to meet the needs of everyone.

Q.—How long will price control remain in Canada?

A.—Price control was established to fight the danger of inflation. And that danger will exist until goods are in normal supply and the possibility of persons bidding against each other for scarce goods is eliminated.

Q.—Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

## Unwilling To Help

### Some British Scientists Refused To Work On Atomic Bomb

Sir James Chadwick, British scientist, said that some of his colleagues refused to help work on an atomic bomb for fear they might be creating a planet-destroying monster. Sir James is an adviser to the American bomb policy committee and a Nobel prize winner. He was a leading worker in the atomic bomb development.

"I don't know how it was in your country," he told a news conference at Washington, "but many of my people were unwilling to help at one time or another hoped it wouldn't work. I often hoped myself that it wouldn't."

What agitated them was the fear that atomic disintegration, once started, might get out of hand and destroy everything. The chances of that were found to be small, Sir James related, "although one never knows."

## Canada's Censorship

### The Responsibility Divided Between Officials And Newspapers

Censorship has existed in Canada since this country declared war, but it has been administered on the whole by co-operation with publishers, editors, broadcasters and others. Such media have not been rigidly prevented from discussing what they felt was in the interests of the public, nor from publishing an almost unlimited variety of news articles, special despatches, editorials, pictures, cartoons, etc., covering current happenings. There was latitude in selection.

That responsibility, divided between official censors and those who distribute news and views, has, we believe, been a big factor in creating the splendid record Canada has made during the war among some 40 or 50 Allied countries. — Kingston Whig Standard.

## T.C.A. SETS RECORD

Trans-Canada Air Lines flew a total of 9,476,937 revenue passenger miles during June, the heaviest month in the company's history, W. J. Dalby, traffic manager, announced. This was an increase of 70.5% over May, which had likewise been a record.

## RECTAL SORENESS AND PILE TORTURE QUICKLY RELIEVED

If you are troubled with itching piles or rectal soreness, do not delay treatment and suffer the tortures of hemorrhoids. Any itching or soreness or painful passage of stool is a sign that you need proper treatment should be secured at once. For this purpose get a package of Hem-Rid from any drugstore and follow the simple directions. Hem-Rid relieves the irritation and itching, soothes the sore tender spots. Hem-Rid is a powerful and highly concentrated and a potent relief of rectal pain and itching. Hem-Rid is a safe remedy may be had at any small drugstore.

If you try Hem-Rid and are not entirely pleased with the results, your drugist will gladly return your money.

## Our Diplomatic Service

### Has Grown By Leaps And Bounds In Recent Years

Canada's diplomatic service has grown by leaps and bounds in recent years to keep pace with our expanding significance in world affairs. In less than two decades it has emerged from the obscurity of two small rooms in Ottawa's East Block to cover the globe.

More than ever it is essential that Canadian representatives abroad should know their country and its problems, that they should "see it steadily and see it whole."

That is one of the essentials of our enlarged scope as leaders of the smaller nations. It is not fair, either to the new trade commissioner or to Canada, that a young man shall be sent, fresh from school or office of the armed services to responsibility in distant lands. Vancouver Province.

## Built Like A Wheel

### Airport At Naga Vay Has Runways In Spoke Shape

New York's new municipal airport, now under construction, has been planned for 8,600 landings and take-offs every 24 hours, utilizing a new type of spoke-wheel runway system.

The runway was designed on the theory that three planes could take off from a centre apron on three different lanes while incoming planes land on three opposite lanes that converge near the apron.

## SMILE AWHILE

"I always believe in weighing my words before speaking," said Mrs. Hopkins.

And you don't give short weight, either," replied her husband.

First employee—"Listen, before you went in to see the boss, you said you were going to get a raise or know the reason why."

Second employee—"Yes."

First employee—"Well, now I know the reason why."

Second employee—"Well, now I know the reason why."

The bride of a few weeks noticed that her husband was depressed. "Girl, cheer up," she said, "I know something is troubling you, and I want you to tell me what it is. Your worries are not your worries now—they are our worries."

"Oh, very well," he said. "We're just had a letter from a girl in Vancouver and she's suing us for breach of promise."

Conductor: "Madam, that child is over five years old and he will have to pay full fare."

Lady: "But I've only been married four years."

Conductor: "Glad to hear that, lady, I ain't interested in your past."

A radio announcer was dining at a small restaurant when a waiter approached him.

"Did you say pudden, sir?" he asked.

"Goodness gracious, no," said the announcer, "and I hope I never shall."

An American soldier, writing from Morocco, says that the war has emancipated the Arab woman. The man still rides the family donkey while the woman walks, carrying the household goods. But the emancipated woman no longer walks behind the man's donkey. She now walks in front of it. There might be land mines.

Down in Birmingham, Ala., a Negro church group attending fish dinner to their congregation discovered a serious omission in the printing of their admission tickets. They had left off the very necessary stipulation: "Not Transferable." The oversight was repaired by a large sign posted at the entrance to the banquet hall, reading: "Nobody admitted unless he comes himself."

Customer (to merchant)—I can't understand how you can retail that article at such a low price.

Merchant—That's easy. We make our profit on the paper and string used to wrap it up.

Young Spot (as he gazed approvingly at his luncheon companion)—"Your Scotch friend would be peevish if he came along and saw you having lunch with me."

Girl (smiling)—"I don't think so. You see we're saving up to get married."

The recruit had missed the target five times.

"Try again," said the sergeant, disgusted. The recruit blazed away again with the same result.

"Where the blazes are your shots going?" shouted the sergeant, losing his temper.

"I don't know," replied the recruit, "but they're leaving this end right."

Buy War Savings Stamps regularly.

# Wise Choice OF BUSY HOUSEWIVES

For meals-in-a-hurry at any time of day—breakfast, lunch, between-meal snacks—clever housewives rely on Kellogg's ready-to-eat cereals. They're ready to serve in 30 seconds... need no mixing or cooking. Easy to digest. Economical, too!

## MEET A CWAC—

"I'm fond of painting, dancing, skating, singing and taking snaps," said Pte. A. G. Lewis, daughter of Mr. and Mrs. David Lewis, Central Butte, Sask. Pte. Lewis, a former school teacher, became a member of the Canadian Women's Army Corps in August, 1944. After completing her basic training at Kitchener, Ont., she took a clerks' course. Pte. Lewis was then posted to No. 3 Admin. Unit, C.W.A.C., Regina, Sask., where she is at present doing administrative work.

## ENLISTS—

Several girls enlisted in the Canadian Women's Army Corps in Regina recently. Included among them were: Norma McDonald, Prince Albert; Phyllis Gadjonson, Wynyard; Grace McLean, Craik; Edith Early, Clair; Norma McLean, Calgary, Alta.; Jean Power, Weyburn; Violet Nystrom, Kamloops.

## HOLLAND HOTEL FOR CWAC—

The first women to wear the distinctive red and blue patch of the First Canadian Army are ten members of the C.W.A.C. who are in charge of the two hotels for Allied servicemen in Amsterdam, Holland. They are responsible for the operation of the hotels and for the direction of their civilian staffs. Service guests, stationed in and around Holland, are invited to spend short leaves in the comfort of luxurious hotels. Room and meals are supplied at a cost of one guilder, about forty-three cents a day. Within a week after the former German occupants took their hurried departure, the CWACs were on hand getting the hotels ready for their guests. Their duties include keeping accounts, preparing diet sheets, and arranging shopping and hospitality tours and home hospitalities. The centres were officially opened at the beginning of July. In charge of the hotel for women officers is Major Esther MacLagan of Moncton, N.B. One of her assistants is Sgt. Irma Smiley, Windhorst, Sask. Highest commendation for the work of the Canadian girls comes from Lt.-Col. George Leir of Calgary, Alta., who commands the First Canadian Army Leave Centre Headquarters in Amsterdam.

## NEWS OF CWAC OVER THERE—

L. Cpl. Victoria Belcher of Barbas, Sask., is now overseas with the Canadian Women's Army Corps. She was employed as a store clerk in Brockville Military hospital prior to her overseas posting. Her husband Pte. Wallace Belcher is stationed in England. One of her brothers is serving overseas and a sister is with the C.W.A.C. in Saskatchewan.

Sgt. Lexie "Mickey" Ramsey, daughter of Mr. and Mrs. R. Hallam, of Weyburn, Sask., is serving overseas with the Canadian Women's Army Corps. She enlisted in November, 1941, took an N.C.O. course at St. Anne de Bellevue, Que., and has since been stationed in Ottawa and Kingston. Sgt. Ramsey was well known in C.W.A.C. sports circles and was active in softball, basketball, bowling and shooting.

Pte. Clara Johnson of Hanley, Sask., is now overseas with the Canadian Women's Army Corps. She enlisted in July, 1943, and has been serving as a postal worker at the Base Post Office in Ottawa. One brother, Pte. Arnold Johnson, is stationed in Regina, Sask.

## Post-War Houses

### Many Innovations And Improvements Have Been Promised For The Future

Science, which has achieved such wonders in wartime, promised the North American world something revolutionary in the way of a post-war house.

There were new shapes for plastic structures. There were new designs in which walls could be pushed back to expand rooms when they were wanted for specific uses. There were new heating devices which warmed the floors and windows which selected the most desirable health-giving rays from the sun. There were many number of innovations and improvements. All of which makes interesting speculative reading. But a few more of the good old fashioned type with basements and fireplaces, wooden walls and shingled roofs would be greatly appreciated in Victoria right now—Victoria Times.

## The Tie That Binds

### Much Prestige, But No Power Attaches To The Governor-Generalship

The amiable tradition that the son of an Earl helps him with those who like Earls, and the fact that he is in his own right a brave and accomplished soldier who commanded Dominion and American troops in North Africa and Italy will help him even more on this side of the water.

Much prestige but no power attaches to the Governor-Generalship. Marjahl Alexander represents in Canada not the Government of Great Britain but the King himself—New York Times.

## GEMS OF THOUGHT

### BOOKS

Books are the true travellers. They give to all, who will faithfully use them, the society, the spiritual presence, of the best and greatest of our race.—W. E. Channing.

There is a choice in books as in friends, and the mind sinks or rises to the level of its habitual society.—Lowell.

Few are sufficiently sensible of the importance of that economy in reading which selects, almost exclusively, the very first order of books.—John Foster.

Books should to one of these four ends conduce.

For wisdom, piety, delight, or use.—John Denham.

The Bible is the learned man's masterpiece, the ignorant man's dictionary, the wise man's directory.—Mary Baker Eddy.

No book can be so good as to be profitable when negligently read.—Seneca.

Lydia E. Pinkham's Vegetable Compound not only helps relieve monthly pain but also accompanying nervous, tired, high-strung feelings—when due to functional periodic disturbances. It's one of the most effective medicines for this purpose. Pinkham's Compound helps nature! Follow the directions. 7c. VEGETABLE COMPOUND

## JAPANESE NOW BEGINNING TO UNDERSTAND THAT THEY ARE BEATEN AND MUST PAY DEARLY

SAN FRANCISCO.—The Japanese people, treated heretofore to a series of face-saving, evasive explanations of their surrender, were told flatly by one of their top leaders they are a beaten people and must pay the price for an imperialist dream bubble that burst in the blast of atomic bombs.

At the same time, Tokyo radio reported that an extraordinary session of the Japanese cabinet had been called by Premier Prince Naruhiko Higashi-Kuni.

After days of shock-absorbing statements to the effect defeat "is but temporary" and "we still think our way of thinking is right," Foreign Minister Shigemitsu put the Japanese position in plain words.

"Unfortunately," he bluntly told a press conference reported by the Japanese Domei agency, "we have to face the fact that we have been defeated."

"This fact should be admitted as it is, and any over-optimistic view should be avoided. Every Japanese should repeatedly read, and realize, the terms of the Potsdam declaration and carry them out courageously."

Despite the flatness of the foreign minister's statements, Domei's broadcast sought to soften the harshness of reality and stressed a statement by Shigemitsu Japan must win "the world's sympathy and understanding."

Earlier Domei indicated Japan's invasion jitters were giving way to "occupation jitters," in denying as "groundless" rumors American troops and a "Chungking army" had landed on Honshu.

Domei said an unidentified Tokyo newspaper had reported rumors Americans had landed at Shimoda in the Izo peninsula southwest of Tokyo and that a "Chungking army" had entered the city of Osaka.

The newspaper urged the Japanese not to credit such "irresponsible rumors" but to "place absolute confidence in the reports announced by authoritative sources, the radio and newspapers," and said, "The landing of occupation armies on Japan's mainland will be done in an orderly fashion after the conclusion of the truce agreement."

The Tokyo newspaper, Asahi, warned that should the Japanese people "fail to preserve peace and order" the occupation forces would be "compelled to step in and strongly interfere in every branch of the central and provincial administration."

Japan's peace government is obligated first to concentrate on relief and rehabilitation, but it also intends "to supply sufficient funds" to permit reconversion of "wartime industries."

## CHARACTERISTIC ATTITUDE SHOWN BY THE JAPANESE IN THE FACE OF THEIR DEFEAT

Emperor Hirohito accepted the resignation of the cabinet which led Japan to defeat, shortly after personally informing the people that their nation was compelled to surrender to the Allies to escape obliteration.

A Domei dispatch recorded by the Federal Communications Commission indicated that Hirohito had requested the resignation of Premier Admiral Kantaro Suzuki and his cabinet. A later English language broadcast by Domei agency said the Emperor had asked Suzuki to remain at his post "pending the appointment of a new premier."

Hirohito's announcement, the first radio broadcast ever made by a Japanese emperor to his subjects, attributed Japan's plight to the invention of the atomic bomb, which he described as "a new and most cruel weapon, the power of which to do damage is incalculable."

"This is the reason we have ordered the acceptance of the joint declaration of the powers," the Emperor declared.

Hirohito—in the face-saving tradition dear to the Japanese—maintained to the end that Japan had been battling only in self-defence and that she had given up the fight "to strive for the common prosperity and happiness of all nations and the well-being of our subjects."

The bitter reaction of Japan's militarists to the ignominy of unconditional surrender, however, was reflected in the immediate suicide of War Minister Gen. Korechika Anami and a broadcast address by Premier Baron Kantaro Suzuki in which he declared:

"This day has become the day that never, never will be forgotten by the Japanese people."

The same bitterness was reflected in a Tokyo broadcast in which Kusun Oya, identified as chief of the overseas bureau of the Japan Broadcasting Corporation, told troops on the fighting fronts of the surrender.

"We have come to a point where

## NAZI MAKES WILL

Leaves Much Land And Wealth To His Wife

BERLIN.—The Berlin Zeitung published what it said was the last will of Dr. Alfred Rosenberg, former Nazi governor of occupied Russia and ideological leader of the Nazi movement.

Rosenberg, now awaiting trial on war crimes charges, was seized by a British patrol in a Flensburg hospital last May. The will bequeathed to his wife a palatial residence in Berlin, an agricultural estate in Austria and his accounts in three banks.

## FOR THE BLIND

Vancouver Grants Tax Free Property For A New Home

VANCOUVER.—The city hall approved a grant of tax-free property to the Canadian National Institute for the Blind, for a new \$100,000 home for Vancouver's blind.

Capt. M. C. Robinson, national director for the institute, disclosed 100 Vancouver citizens had contributed \$135,000 to the project which will accommodate 60 persons.

## ESTABLISH AIR SERVICE

CAPETOWN, South Africa.—Air service between England and South Africa will be established next year on a 50-hour basis with new Tudor planes, South African Airways said. Fares will be between \$600 and \$800. The time later will be reduced by night flying, the announcement said.

ON BIG FIVE COUNCIL—Georges Edouard, the former French professor who became a leader of the underground and became Gen. De Gaulle's foreign minister after the liberation, will be a member of the council of five foreign ministers set up by the Big Three at Potsdam to draft Europe's peace treaties.

## REGISTRATION CARDS

OTTAWA.—For convenience, rather than necessity, the use of national registration cards will be continued for a while, Arthur MacNamara, deputy labor minister, said. As long as rationing continued, said Mr. MacNamara, the cards would provide a useful means of identification and also were almost a necessity for cashing family allowance cheques.

HIS MAJESTY KING GEORGE VI broadcasts a stirring message to the Empire.

BIG WELCOME FOR CANADIAN SOLDIERS—Among the hundreds at the dockside cheering the return of thousands of Canadian servicemen on the big liner, S.S. Louis Pasteur at Quebec City was Defence Minister McNaughton. General McNaughton was among the first to board the ship and welcome the boys home. (Top), General McNaughton is shown waving his hat to the men as the ship pulled into dock. With him are left to right, Lt. Col. A. Cote, District Chaplain (RC); Brig. E. A. Blais, (behind Gen. McNaughton's arm); Major General H. Young, Quartermaster General and Lt. Col. Paul Triquet, V.C. (Bottom) Troops pack the portside of the Pasteur for eager glimpses of their homeland, after several years overseas, while the tugs play streams on the tropicship.

## SAYS THERE IS PLENTY OF WORK AVAILABLE IN CANADA DESPITE WAR PRODUCTION CUTBACKS

OTTAWA.—There will be plenty of work for everyone in Canada, spread through the newspapers the appeal for everyone to get back on their ordinary jobs.

Why such a labor shortage should exist in the face of steady cutting of munitions productions is not entirely explainable. One feature is that a huge number of women employed in the war industries have just evaporated—apparently gone home. Another is war workers gradually getting back into civilian employment.

For example, the existing labor shortage in three principal cities of Canada on Aug. 12 last was as follows:

Montreal, shortage 18,566 men workers and 10,930 women.

Toronto, short 10,695 men workers and 5,255 women.

Winnipeg, short 32,076 men workers and 14,074 women.

It is the lack of labor that is holding up the big primary reconversion campaigns, such as house and building construction, and expansion of agriculture.

A big agricultural campaign is held up by lack of labor to produce the castings in foundries, needed for agricultural machinery. Bricks, lumber and soil pipe can't be obtained for new houses.

Agricultural machine companies are now reconverted to civilian production and anxious to expand, but can't get the castings sufficient for full production.

On the average returned soldiers take about three months off before they get back into civilian work.

## NEW REGULATIONS TO SPEED UP AND ALSO TO FACILITATE THE ARMY DEMOBILIZATION

OTTAWA.—New regulations to "facilitate and speed up" the demobilization of the Canadian army, extending to service personnel not previously eligible the opportunity for immediate discharge, were announced by Defence Minister McNaughton in a detailed, 900-word statement.

The various classes now eligible for immediate discharge under the new regulation include the following:

1. Personnel on compassionate leave or compassionate firm leave on V-J Day, if on such continuous leave without pay prior to V-E day. These now may be discharged regardless of priority point score, but in effecting the discharge, care will be taken to avoid withdrawing the individual from his job at an inopportune time.
2. Personnel for whom no suitable military employment can be found because of age or low physical profile, where the profile is not low enough for discharge as physically unfit.
3. Personnel with a demobilization priority point score of 150, computed as of March 31, 1945.
4. Personnel who have been wounded.
5. Repatriated prisoners of war.
6. Personnel who have served in the First Great War.
7. Personnel who have attained their 42nd birthday.
8. Personnel under 19 as of V-J day.
9. Personnel who have been so recently enlisted into the army that they still are in district depot awaiting forwarding to the Vernon training brigade.
10. Members of the C.W.A.C. in addition to the above, who request release because they are married to discharged servicemen of the navy, army, air force or merchant marine, or who are married and can produce bona fide intentions of setting up a home.

Demobilizing authorities said certain key personnel such as cooks, clerks and members of the medical and pay services will have to be retained in the army to maintain efficient machinery for releasing the bulk of army personnel.

It was also stressed that no person would be forced to accept a charge if he elected to stay in the army and could be efficiently employed in an available job. In addition, all discharges will be subject to the exigencies of the service.

In the case of personnel under 19 who now are taking trades training courses in the army, they may remain to complete their courses if they so desire, following which they will still be eligible and may apply for immediate discharge.

No change of policy is contemplated in the present system whereby priority discharges may be granted to personnel required to satisfy critical civilian manpower needs on work of national importance. These are now dealt with through the industrial selection and release plan.

The central board in Ottawa will be concerned mainly with policy while local committees will in future submit recommendations direct to the district officer commanding who may now take action locally. Cases affecting personnel who are serving overseas will still be cleared through national defence headquarters at Ottawa.

The statement said the army was determined that demobilization would be carried out "as rapidly and as efficiently as conditions permit," and added:

"For this reason the new regulations are designed to supplement rather than interfere with the existing policy whereby long-service men with high priority points are being returned to civilian life in daily increasing numbers. This is functioning smoothly and will continue to expand as more long service men are returned from overseas."

Buy War Savings Stamps regularly.

Mr. and Mrs. Bruno Rypien and family and Mr. and Mrs. R. Gris and son, of Natal, have returned from a vacation spent at Manville, 100 miles northwest of Edmonton, where they visited relatives.

## Letter To The Editor

Editor, Journal.  
Dear Sir:

The Board of Trustees of the Coleman School District No. 1216, hereby submit to the ratemakers of Coleman a statement and report of the provincial Sanitary Inspector. The Board hereby wishes to state that the provincial Sanitary Inspector has the authority to enter any dwelling, business place or public building in the province for the purpose of inspecting same.

Re: Sanitary Conditions  
Coleman Schools

## HIGH SCHOOL:

The building was erected about six or seven years ago and of fire-proof construction throughout. Decoration of the rooms was done about a year ago and in that respect conditions are good.

I noted however, that the dusting of shelves, desks, baseboards, radiators and wooden fixtures was somewhat neglected, leaving room for much improvement in that respect. The chemistry laboratory situated in the basement was found in a very dirty and neglected condition. Sinks apparently left unwashed and grime was noticeable everywhere.

In the laboratories I noted also that the plumbing fixtures such as toilet pedestals and urinal could be much improved by an occasional application of soap and water.

## PUBLIC SCHOOL:

Here again my comments in regard to the janitor work may also be applied. I do not imply that the work is willfully neglected, but more care should be taken to clean corners and ledges which do not come within the ordinary reach of every day dusting and sweeping. I noted sand boxes in the classrooms of the public school, one of which was not being used for its original purpose, but only as a catch-all for sundry articles. The box was very untidy.

## WEST COLEMAN SCHOOL:

This school is a four-room school situated in West Coleman.

There I found conditions of a much higher standard maintenance throughout the whole building. In-

deed I might say that conditions compare favorably with any school in Alberta so far as cleanliness is concerned. The painting, varnishing and other decorative work, even to the painting of the pipes in the boiler room left nothing to be desired. Very commendable indeed.

## Serviceman's Corner

By J. O. S.

The third group, which we have defined as those whose education has been disrupted by the war, is one of our most important. If we are to look for any security for our future, Fortunately the legislation affecting this group is quite simple, and the success of the adventure depends almost entirely upon the individual.

One of the most important points to remember is that you must make application and commence your education within fifteen months after discharge, unless you can furnish the department with some valid reason for not doing so. The regulation of fifteen months has been subject to some criticism and rightfully so. There is a group of returned men and women whose experiences have been such as to delay their decisions as to their final occupations in life. This being the case there should be no good reason why they should be compelled to make a decision within fifteen months. This, of course, does not apply to all men and women in this group, but more particularly to the younger service personnel, who, due to the experiences of the service and lack of experience in our economic setup, will not realize the importance of a profession or trade until they have had experience with the world. It also applies to those who have suffered mentally and physically, and as a result should not be called upon to make any hurried decisions that they might regret at some future date, when it is too late. I am not criticizing these men and women for this condition, but merely pointing out that it would be for their benefit.

For those who cannot qualify for university entrance there is a pre-matriculation school in operation at the old No. 2 Wireless School in Calgary, with admittance at any time. The length of time you are required to attend this school depends upon your educational standing, how long you have been away from school and the amount of work you put into it.

Those who have attended university previously and have not completed their course may gain admittance and, although they may be advised to take a refresher course in some subjects, they can carry on almost immediately.

Post-graduate work may be carried on by those who can qualify and desire to improve their standing.

The period the department will finance you for depends upon the length of service and academic standing. The regulation states month for month, but this may be extended in exceptional circumstances.

It will be to the public's advantage if all those who can qualify and have the desire for higher education take full advantage of this means of re-establishment. I do admit that there are certain parts or programs that are not quite adequate, but I do deplore, as all persons should, the statement that

these men and women are given too much.

The Canadian Legion is aware of all these problems and are doing their utmost to secure changes to the advantage of the returned men and women. I wish to thank all the organizations that are giving so much of their time to the servicemen's problems and hope they will continue their most important work. It is only by means of public discussion and the sentiment of the people that we are able to secure the changes which are and will be necessary before we can call our re-establishment process a job well done.

## LOCAL NEWS

Mr. and Mrs. O. Smith have returned home from a holiday spent with their daughter, Mrs. L. Sanderson, and Mr. Sanderson, at Kimberley.

Alta. and Sask. Get  
Horse Meat Packing  
Plants

Farmers and ranchers in southern Saskatchewan did not realize eighteen months ago that their objectives would become a reality so soon. They were concerned with the conservation of the grazing lands and food reserves of the country. Surplus horses were ruining the pasture reserves and were a liability to the livestock. Today this liability is being turned into an asset. A contract for 10,000 tons of horse meat, both canned and pickled, has been obtained from the Belgian government by the Horse Co-operative Marketing Association. Two processing plants are being established; one at Edmonton to serve northern Alberta and northern Saskatchewan and the other at Swift Current to serve southern Alberta and Saskatchewan. They will be in operation before October 1 and the contract will involve the movement of over 100,000 horses before January, 1947. This movement will stabilize the livestock industry more than any other single factor in the two provinces. That is the objective behind those who have given their time and energy to this project. A liability of long standing is being turned into an asset and over five million dollars will be returned to the farmers and ranchers of Alberta and Saskatchewan. It is a co-operative movement on the part of producers themselves and the non-profit motive prevails. Only those who ship horses through the plants will participate in the profits.

The contract for 10,000 tons of horse meat to Belgium will involve the processing of 100,000 horses. These horses will be taken from all areas of the two provinces, and an effort will be made to take as many horses as possible from the drought areas in Alberta and Saskatchewan as plants begin operations this fall to relieve the serious feed situation.

There is a demand for all by-products, such as horse hides, horse hair, horse oil, meat meal, tankage and bone meal. These products have a high market value and will as-

sure a good return to the horse owner. Horses being marketed for slaughter at Swift Current will be paid for on the basis of fleshy condition. An initial payment will be two cents per pound live weight for horses in good fleshy condition, with further payments in the form of patronage dividends. Horses in medium or poor flesh will receive a lower initial payment. The basis of live grading will be determined on the meat recovery from three hundred horses to be put through one of the plants.

The co-operative is capitalized at \$500,000 with shares at \$1 per share. The provincial government of Saskatchewan guaranteed \$50,000 to the bank to enable the co-operative to commence operations. A further guarantee from the Saskatchewan government of \$2 for every \$1 raised by members will

enable the co-operative to raise its objective of \$100,000. Horse owners are asked to subscribe share and loan capital, with monies loaned guaranteed 4% interest. As horses are delivered to the plant, further deductions of \$3 per horse is made for loan capital. Each horse entitles the owner to a share in the co-operative. Identification of horses must be maintained so the producer will receive the benefit of patronage dividends. Horses shipped to the plants are, of course, slaughtered and all freight charges over 25 cents per cwt. are absorbed by the co-operative.

Horse owners are also asked to list their horses immediately so quota deliveries can be given to districts in the two provinces. Those paying their \$1 share per horse in advance are given a priority in delivery to the plants.

## Attention MR. FARMER and RANCHER

**JUST THIS** HOME won't built in a day and neither can the Horse Co-Op Marketing Plants take all of your horses in one day. There are over a quarter of a million surplus horses in Alberta and Saskatchewan alone, and it is only possible to process a mere fraction of that number each day.

**BUT** You can get a priority on this by becoming a Co-op member and letting your surplus horses. This entails having a share for each horse to be sold. In this way you will have a priority to your desired on a quota basis. You will also be backing up your Co-op and enable them to pay off the Government loan that was granted in order to begin operations as quickly as possible, and thereby give the producers control of their own organization. This deal, payable in advance being of your horses, is not a shot but gives you a share in the business. This is a Producers Co-op. You as a producer will get behind it to make it a success.

**WARNING** Do not send horses in to the plant unless you have been properly instructed to do so. The Co-op members are responsible for the handling of horses where proper shipping instructions have not been followed. Further information will appear in your weekly newspaper or can be obtained through your Agricultural Representative.

Please send listings and further enquiries to Swift Current, Sask.

## Cigarette Fund Notes

Dear Sirs: Thank you for the 300 Sweet Caps. As I may be leaving for Canada in the near future I thought 'fair to inform you not to send any more cigarettes. I wish to express my sincere appreciation to all who made possible this kind gesture.—John Goldring.

Dear Sirs: Just a line to thank you ever so much for 300 Sweet Caps which I received yesterday.

They are as always very much appreciated indeed. Please thank all in Coleman who make the receiving of these smokes possible for me.

I was very sorry to learn of the passing of our very good old friend Harold Houghton by Cpl. L. Caroe and Fred Guerard. He will always be remembered by me as he will be by everyone in Coleman, I am sure.

My old unit, 1st Cdn. Survey Regiment, has broken up and I am now just outside the town of Denver in Holland. Sure hope I can

get home by Christmas. Cheerio and best wishes to all my old Coleman friends.—Archie Wragg.

Dear Sirs: Received 300 cigarettes today for which I wish to say many thanks. Things are not too bad with me, although, of course, I would like to get back to Canada. We were supposed to leave for England this month, but it has been put back and now I am not sure when we will be leaving. I am hoping to be back home for Xmas anyway.

I have received quite a few Journals lately and was surprised to read of Harold Houghton's death as well as that of Walter Bobbitt. There will be a few of my old friends missing when I get back I hope the Legion is still going strong. Say hello to all the boys for me. It is a long time since I had a game of crib, but one of these days I will be in to have a game with the boys.

Many thanks for the smokes and the best of luck to the boys.—Olivier Barringham.

Dear Sirs: Thanks for the tobacco which I have just received. Will thank you all personally as I expect to sail for Canada before long so please cancel the tobacco order.—W. S. Vollendorf.

### MR. AND MRS. GEO. BIELESCH LEAVE FOR CALGARY

Mr. and Mrs. George Bielech, Greta, Anna and John left on Wednesday for their new home at Calgary, where Mr. Bielech has purchased a rooming house.

Mr. Bielech first came to Canada in 1906, settling at Bankhead. He later came to Coleman in 1924, working for a few years at McGillivray and later with International company. He has been in the mines for 52 years and during that time has never met with a major accident, a feat which he attributes to luck.

Some time ago he purchased a rooming house in Calgary and he and Mrs. Bielech will give their personal supervision. They hope to visit Coleman at fairly regular intervals, as members of their family still reside in Coleman.

### ST. PAUL'S UNITED CHURCH

The 13th Sunday after Trinity:

Holy communion 8 a.m.

Evensong 7 p.m.

### WEDDINGS

#### VENIER—WILSON

In Mount Hope United church on May 25 at 7 o'clock in the evening Janet, daughter of Mrs. Wilson and the late Mr. Arthur Wilson, Coleman, Alberta, was married to Naval Airman 1st Class Marx Richard Venier, eldest son of Mr. and Mrs. Joseph Venier, Bellevue, Alberta, stationed at Mount Hope. Mrs. Lyle Smith, Mount Hope, presided at the organ and the CGIT girls' choir under the direction of Mrs. Ross A. Macdonald, sang. Rev. George T. Simpson, Mount Hope, officiated.

Given in marriage by Mr. Lyle Smith, Mount Hope, the bride was attired in white silk jersey, with veil. She carried red roses. Her bridesmaid, Miss Donna Jean Smith, Mount Hope, was in shell pink, with headpiece of flowers and net. She carried sweet peas and pink roses. Little Miss Betty Simpson, Mount Hope, was flower girl in a smocked silk dress of baby pink and carrying forget-me-nots and pink roses. Naval Airman 1st Class William Shorten, Calgary, Alberta, was best man.

A reception was held at Roberts' in Hamilton, after which the couple left for Niagara Falls. The bride wore a turquoise blue suit, with navy blue topcoat and accessories and a corsage bouquet of white gardenias.

### THE ANTIQUITY OF THE PIPES (M.A.J.)

It is an admitted fact that the bagpipe is an instrument of great antiquity. According to tradition Gillidh Callum was Noah's piper and Noah danced to his music over two crossed vine plants when he had discovered and enjoyed the inspiring effects of his first distilla-

tion from the fruits of his newly planted vineyard. The dance alluded to seems to have been originally performed over vine plants, but swords, however, came to be more numerous in Scotland and they were substituted.

Some historians assert that the Celts are descended from Gomer, the eldest son of Japheth, son of Noah, a theory which would go far to substantiate the Gillidh Callum story, for if there were Celts in the days of the ark, why should there not have been pipers?

A verse translated from the ancient says:

"Music first on earth was found  
In Gaelic accents deep;  
When Jubal in his oter squeezed  
The blether 'o a sheep."

We read of bagpipes being used among the ancient peoples of Babylon, Chaldea, Persia, Africa, Arabia, Greece and Rome. An ancient terra cotta excavation at Tarsus and supposed to date from 200 BC represents a piper with a wind instrument.

That the instrument was in use among the Romans is indisputable. An historian who wrote a history of the wars of the Persians, the Vandals and the Goths, states that the Roman infantry used it for marching purposes, and he describes it as having both skin and wood extremely fine. There is in Rome a fine Greek sculpture representing a piper playing on an instrument closely resembling the Highland bagpipe, the performer himself being dressed not unlike the modern Highlander. This is also shown on several coins of that period.

Coming down to ages of which we have better historical records, we find a drawing of the thirteenth century which depicts a girl dancing on the shoulders of a jester to the music of the pipes.

In 1314 at the battle of Bannockburn the Clan Menzies are alleged to have had their pipes with them and relics of that instrument are still in existence today.

In 1327, during the reign of Edward III, two pipers received permission to visit schools for minstrels beyond the seas and thus the bagpipes became a favorite in Ireland.

There are no English literary references to the instrument until the time of Chaucer, in 1380, when the poet makes the miller in the "Canterbury Tales" play on the pipes.

"A bagpipe we cowde he blowe  
And therewithal he broughte us  
out of towne."

So it seems the company of Pilgrims left London accompanied to the strains of the bagpipes. As time progressed this instrument came into favor throughout Europe, being particularly well liked in the courts of France during the reign of Louis XIV.

Various forms were in use, but of them all, the great Highland bagpipe has survived the test of time.

## Theatre Notes

"WAVES" ARRIVING ON TIDE OF COMEDY AND ROMANCE

The consensus of opinion by preview audiences who've seen Paramount's "Here Come the Waves," arriving Saturday at the Palace theatre, is that Mark Sandrich has scored again! Producer and director of this film, Sandrich won superlative praise for another fine motion picture, "So Proudly We Hail."

Starring players of "Here Come the Waves" are Bing Crosby, Betty Hutton and Sonny Tufts—and one particular production number, "Accent-tchu-ate the Positive," featuring the hit song by Johnny Mercer, seems destined to fascinate audiences with its solid rhythm, we are told. The screenplay by Alan Scott, Ken Englund and Zion Myers tell about the Miller twins, Susie and Rosemary, played by Betty Hutton in a dual role. The twins are dancers, but decide to join the Waves for the duration. While in training, they meet the singing idol of the nation, played by Crosby, who falls in love with Rosemary. Susie, however, really has a crush on Bing, and that's where the fun begins.

With the aid of Windy, portrayed by Sonny Tufts, Susie contrives to win the groucher's attentions. Tufts, also in love with Rosemary, does everything possible to block Bing's romance. Things are complicated even more by the fact that both Bing and Sonny are Navy gobs. When the final showdown comes, plenty of surprises are in store for the customers, previewers say, with a surprise ending which keeps everyone happy.

Topping off the broadside of comedy and fun is a gala musical show under Bing's direction. Staged as an attraction to recruit Waves, the show is a howling success. Bing and Sonny do a black-face act, Betty goes into several of her now famous routines and there

is a plentiful supply of songs and comedy. Among some of the tunes destined for the big time are "Accent-tchu-ate the Positive," "Let's Take the Long Way Home," "I Promise You," the title song, "Here Come the Waves," and an old favorite, "Black Magic."

"Style Without Extravagance"

Another  
policyholder  
reports...

"I AM A BANKER, the father of a son, and a policyholder in The Mutual Life of Canada. Many years ago my father, who was also a banker, and who saw directly how life insurance can benefit men and women in many ways, impressed on me

the value of life insurance. He obtained a policy for me when I was a child, and when I started to work in a bank in my early twenties I purchased another \$1,000 policy with The Mutual Life.

"WHEN I MARRIED I insured again, for a larger amount, to give my wife the protection she needed. I chose 20 Pay Life insurance, preferring that plan because I have to make only twenty payments of the same amount, during my best earning years, and then my insurance will be paid-up. When I am ready to retire I can, if I wish, use the cash value of my insurance to purchase a monthly income.

"Now, from my own experience as a banker, I am realizing the wisdom of my father's advice and am teaching my son the value of life insurance."

LIFE, FIRE, SICKNESS AND ACCIDENT, AUTOMOBILE

Over a world dyed dark with suffering breathes the deep sweet sigh of Peace; and countless hearts are lifted up in praise and unutterable Thanksgiving to Him who was our shield and our shelter when the earth did tremble--- which now is still.

May the sacrifice of young lives spent and sorrow endured commend us to Him who sustained a righteous cause that Hemay order the beginning, direct the progress and perfect the achievement of the work which Peace makes paramount today.

T. EATON & SONS LIMITED

WORLD HAPPENINGS  
BRIEFLY TOLD

Thanksgiving Day will be celebrated in Canada this year on Oct. 8, the second Monday in that month, it was announced at Ottawa.

The 26,000-ton French battleship Strasbourg, scuttled with the French fleet in Toulon in November 1942, has been refloated and is being refitted there.

Church attendance is increasing in Berlin. The American military commander said 174 Christian churches and at least one synagogue are functioning again.

One of the last ships to leave Dunkirk in 1940, the London, Midland and Scottish railway steamer, Princess Maud, was among the first to touch down in Normandy on D-day.

The British Broadcasting Corporation has given up the Criterion and Paris theatres in central London, which, it may be revealed now, were used as studios throughout the war.

Princess Elizabeth, who recently completed her non-commissioned officer's course in the Auxiliary Territorial services, has been promoted from second subaltern to junior commander.

Denmark was admitted to full-fledged membership to the United Nations relief and rehabilitation administration by unanimous vote of the council under a suspension of the rules.

The famous sea-going officers' club, known as the Crow's Nest, at St. John's, Nfld., has closed and 8,000 Allied officers and rehabilitation administration after rough Atlantic runs will shed a sentimental tear.

## Hard To Take

But German People Have To Accept Terms Of Allies

Defeated Germany stares into a Spartan work-filled future, shorn of airplanes, shipping and all war-making potential. She nevertheless can hope for eventual return to the world's family of nations.

That is the pattern laid down for her by Prime Minister Attlee, President Truman and Premier Stalin in their Potsdam communiqué.

All the sting and venom of the Reich is to be removed. This includes all Nazi organizations, all the German army, navy and air corps, all of Germany's once rich merchant marine and commercial air service and all arms production.

Chemical and metallurgical industries which count in war potential are to be strictly controlled, as are imports, which could feed a secret war effort.

Nevertheless, Germany has been told that she can have a standard of living "not exceeding the average of the standards of living of European countries", expressly excepting Russia and Britain.

Germany is told she must work for her living. She is to be treated as a single economic unit. This fact, added to the Big Three's silence on partition, makes it appear the Reich is to be left whole, except for drastic boundary changes, when the peace is written finally.

Emphasis, the Big Three said, is to be on agriculture and "peaceful domestic industries." The communiqué leaves to Germany to produce what she needs.

The length of Allied occupation doesn't even get a hint.

The German city of Stuttgart was famous for a library collection of 8,500 bibles, printed in approximately 100 different languages.

Bamboo, a hollow-stemmed plant, has been known to expand 16 inches in circumference in a day.

## Churchill Biography

Very Interesting Story Written By Professor Of Cambridge University

The story of Winston Churchill has been reviewed in the most interesting biography, written by Sir Ernest Barker, Emeritus Professor of Political Science, Cambridge University, and published by the British Ministry of Information. Illustrated with many pictures of the very photogenic British statesman, the book reviews Churchill's life from boyhood to the present time. The author points out that Winston Churchill belongs to an old family which settled in England as long ago as the Norman Conquest of 1066, and his family first flowered into greatness two hundred and fifty years ago in the person of John Churchill, the first Duke of Marlborough, who guided and inspired a heroic Coalition in the same spirit and with the same genius as his descendant has guided and inspired the Union of the Allied Nations. Much of the career of his ancestor, whose life he has written in a work of four volumes, is being repeated in the career of Winston Churchill. It was at the end of the Conference of Prime Ministers of the Commonwealth in May of last year that Sir Piroz Khan Noon, one of the representatives from India, paid Churchill this eloquent tribute: "It is the clear-headedness of the leader and his policy which enables the various component parts to stay together, and you personally have, through your leadership, taken the Empire and the Commonwealth from strength to strength." The author concludes his biography with the tribute that "the man himself, who has always proclaimed his faith in the Commonwealth and Empire, and has always labored to the best of his power according to his faith, stands justified today of his faith and all his labors."

## Biscuit Bombing

Dropping Food From The Air Developed Australia Air Force

"Biscuit-bombing," the Royal Australian Air Force supply dropping system has grown to such an extent from the early start in New Guinea in 1942 that it is capable of keeping the fighting elements of whole army divisions fed and armed in New Guinea, New Britain and the Solomons, the Australian News and Information bureau here has announced.

Some idea of the growth since those dark days when they threw out boxes of bully beef and biscuits without parachutes from low-flying planes during the Owen Stanley campaign fighting of 1942 can be gained from one day's work in the Wewak, New Guinea, area. Douglas transports of the R.A.A.F. recently dropped 48,540 pounds of equipment and goods to the army in less than 24 hours to help capture this important Jap stronghold.

One of the methods used is the "storpedo", a bomb-shaped container in which can be placed newspapers. It can be carried in the bomb racks of some planes and dropped by parachute.

## JUST FOR WAR CRIMINALS

The death penalty will be abolished in the Netherlands after all the war criminals have been punished, it has been announced. Unknown in pre-war Holland, the death penalty was introduced by special decree Sept. 4, 1944, to enable special tribunals established to hear cases concerning collaborators and traitors, to punish those persons if their crimes called for such treatment.

## Health LEAGUE OF CANADA presents TOPICS OF VITAL INTEREST

## SPECIALISM

Specialists have been busy for centuries creating all sorts of things which might serve the whole of humanity, but which end up doing more harm than they do good, writes Dr. Gordon Bates in the current issue of Health magazine of which he is the editor.

Dr. Bates also is General Director of the Health League of Canada, of which the magazine is the official organ.

"Specialists have created gunpowder, dynamite, V bombs and poison gas in spite of the fact that research in chemistry and physics could be directed wholly in the interest of human health and happiness," Dr. Bates says.

"It was a wise citizen of French Canada who, the other day, said that specialism is another form of ignorance. As a matter of fact, the trouble with the specialist is that too often he excludes from his mind nearly everything but that which is closely associated with his own specialty and tends to go through life like a horse with blinkers."

"Business men, specialists in their field, tinkered with tariffs and created masterpieces which appeared to their author to be a contribution to their country's good, but ignorance of the laws of economics have made their well-meant efforts result in chaos and war. Specialists in medicine have made great cures for disease which should be prevented, or have relied on medical means for preventing disease, the causes of which are social—and the same thing goes for theology."

"The remedy—good cultural education for everyone before entering on a life career. Every child has a right to a good sound general education before he becomes a specialist in anything. And for the benefit of mankind we should see to it that every child gets the education he deserves. Furthermore this education should be as broad and as extensive as the state can afford."

"We have suffered enough from half-educated specialists."

Advertise what you would do and then make doubly sure that you do what you advertise to do. That is what makes the fullest success of advertising.

Mexico's mines account for nearly half the world production of silver

## For Rural Schools

Showing Of Films Tie In With The Subjects Being Taught

Rural school inspectors and teachers have an ally in the National Film Board. Many small schools with no projection equipment of their own now have showings of films on social studies, science and natural history and other subjects each month when the Film Board field representative arrives on his regular visit to their community.

Films on the geographical features, natural resources and industries of Canada, as well as of countries in other parts of the world, have helped to make geography a favourite subject, while those on the rotation of the earth have aided teachers in explaining wind belts and the change of seasons. Pictures on nutrition have proved effective in persuading school children to drink plenty of milk and eat more vegetables.

Teachers frequently base assignments for essays, the drafting of maps and posters on films of special interest, which have been shown to the pupils. Models of totem poles, old-style threshers, or Dutch villages have been made by children after seeing the originals on the screen. Pupils in the higher grades at some schools take full charge of the showings and conduct debates on the subject of one of the films at the end of the program.

In addition to National Film Board productions, the field representative is glad to screen whatever educational films the teachers have secured from other sources to tie in with the topics which are teaching. This service has made it possible for more schools than ever before to make use of the material in Department of Education film libraries to provide greater educational opportunities for children in rural areas.

## Spreading The News

Leaflets Scattered Over Enemy Territory From Balloons

The secret of how leaflets were scattered on Germany when no Allied aircraft had been over the Reich, is now out. They were released from balloons filled with fuses burning at the rate of one inch in six minutes. The fuse could be adjusted to last up to eight hours and to drop leaflets at regular intervals. After its job was done the balloon exploded in mid-air.

Java is the most densely populated island on earth.

## OUR COMPLETE SHORT STORY—

## Fire And Water

— By —  
SEYMOUR RICHIN

McClure Newspaper Syndicate

Joe found Lenny still in bed. It was four o'clock in the afternoon so it looked funny.

"What's the matter with you?"

Lenny turned his head slowly, jerkily, and with considerable care. His face and neck were a bright and painful red. "I'm sick," he said.

"Don't be stupid, Lenny. You can't afford to be sick. Not now. You've got an important job tonight. Joe stared at Lenny's face and frowned deeply. "Hey, What?" He stepped closer and peered down. "You're burning up."

"Sunburn," Lenny mumbled. "Pretty bad."

"Sunburn?" Joe gave a low whistle. "You mean you've got to stay in bed?"

"I'm on fire," Lenny said, keeping his body rigid. "I can't move. Went down to the beach yesterday. Fell asleep." Lenny tried to lift his arm but stopped with a low cry. "Gee, but it hurts."

"Oh, my Lord! Of all the things to happen!" Joe dropped down into a seat. "Lenny, you need a nurse. Sunburn! I suppose you forgot that tonight is Violet's sister's wedding and you're one of the ushers."

Lenny's eyes widened. He made a violent effort to rise to his elbows but fell back, face twisting, and breath coming in painful gasps. "That's right, Joe, it is tonight. I did forget!"

Joe was sarcastic. "I'm glad you woke up. Now you can go to sleep again."

"Go to sleep?" Lenny screamed. "You must help me, Joe. I've got to get into a soup and fish! And fast! I promised Violet I'd be there. She'll never look at me again!"

"Take it easy," Joe advised. "How can you climb into a boiled shirt now? Remember the stiff collar with the sharp edges? You'll pass out before you take a step."

Lenny looked at Joe with horrified eyes. "What'll I do? I've got to get to that wedding! Violet, Joe, I'll lose her. You know how girls are about these things. I'll look like a heel. If I don't go, I'm sunk."

"Not sunk," Joe corrected acidly. "Cooked is the word. And DON'T you deserve it. Sleeping on a beach! Good Lord, and I thought you didn't like beaches!"

"I don't," Lenny said. "Ever since last year, I'd much rather play baseball than bathe. It was Stanley Winsett's idea. You know, the lawyer."

"The sneak, you mean. I never liked Stanley Winsett. And in case you don't know it, he's been hanging around Violet lately."

"What?"

"Don't bust a lung. Stanley is looking to win your girl friend. So beware." Joe was about to say something else but he didn't. A queer light came into his eyes and he leaned over his friend. "Say, Lenny, did you tell Stanley about the wedding tonight? Does he know you're supposed to be an usher?"

"Sure. All the fellows know."

Joe straightened up. "Stanley's out to queer you, Lenny. Ten to one he took you down to the beach on purpose, got you good and sunburned, to keep you out of a soup and fish."

"Yeah. I ought to sock him. I told him to wake me up if I got too red. But he left me."

Joe smashed his fist into his palm. "Sure. He's pretty slick. You're a

blond guy so he knew you'd sizzle under the sun. After tonight he'll figure Violet is through with you and that he's got her."

Lenny's eyes blazed. "Till—"

A phone ring interrupted him. Joe picked it up. "Hello. Who is this?"

"Stanley Winsett."

Joe shot a sharp glance at Lenny. "It's Stanley?"

"Stanley?"

Joe covered the mouthpiece. Yeah. Says he's got some interesting news.

"Let's hear it," Lenny said. "Drop down closer to the bed, Joe."

Joe did so. "Hello, this is Joe. Lenny's sick. T'll take the call."

"Fine." The voice came over loud enough for both to hear. "Tell your pal to forget about Violet. Joe. I've just called to tell her about his sunburn. She was quite upset. Said something about a wedding and a promise—"

Stanley's smug laugh came over the wire. "Violet asked me whether I had seen Lenny. I told her I saw him with a pretty girl on a raft a few hundred yards offshore—"

Joe was about to shout something but Lenny shook his head for silence.

"I said," Stanley continued, "that being all alone on a raft with a pretty girl, way out in the water, would take any man's mind off the sun."

Stanley's mocking snicker was followed by a sudden sharp click.

"He's hung up," Joe said slowly. "The rat. By, that's the fanciest double-cross I've heard of in years. A raft and a girl. That'll take some tall explaining."

"No, it won't," Lenny said, after a pause.

"You're crazy. Violet won't see you now in a million years."

"I expect," Lenny said with a strange smile, "that she'll be here in five minutes. That Stanley was too smart for his own good." He winked at Joe. "That stuff about me being on a raft with a pretty girl—"

There was a buzzing in the room. "Push the button near the door, will you, Joe? That's the downstairs bell. Violet, no doubt. Coming to tell me she doesn't believe a word of Stanley's story."

"I'd love to know what you're talking about, Lenny."

"That business about the raft a couple of hundred yards offshore. Do you think Violet will believe that?"

I almost drowned last year which is the reason I dislike beaches. Yeah, yeah. I can't swim. Not one single stroke!"

Start Great Sweep

British Miners Sweep Have Big Job Of Clearing Coastal Waters

One hundred British mineworkers have begun the greatest sweep of the war, clearing the vast defensive mine barriers laid round the shores of Britain to protect coastal shipping, the admiralty announced.

A total of 160,000 moored mines were laid in these barriers during the war and although some broke away in gales and drifted ashore, thousands remain. In addition, hundreds of Axis mines lie outside the main wartime channels which were not swept during hostilities.

Since 1945 more than 2,000 mines have been swept, and during July mineworkers cleared them at the rate of 300 to 350 a week.

Java and Sumatra are among the most volcanic regions of the world.

FISHING IS CANADA'S NATIONAL SPORT—Canada's fine fishing grounds are great tourist attractions and visitors come from all over the world to enjoy the sport. The beauty that Peggy Merchant displays here was caught after a real struggle. U.S. tourists in Ontario are permitted to send a day's legal catch home but many go far beyond that and ship back large catches for sale against regulations.

## IN SIMPLE TERMS

What Atom Is Has Been Described By A Layman

Here is a layman's description of the scientific terms which have been variously used in discussions of the atomic bomb which was dropped on Japan.

Atoms are the units of which all matter is made. There are 92 different kinds of these atoms, one for each of the 92 chemical elements.

These 92 elements range from hydrogen, lightest in weight, up to uranium which is the most massive. In between lie carbon, tin, gold, radium and all the other known substances in the universe.

Every one of these 92 different kinds of atoms is made of exactly the same kind of small particles. The only difference between one atom and another is in the number of particles.

Hydrogen, for example, has three particles and uranium more than 100.

The particles are electrons, which are negative bits of electricity, protons, which are positive bits of electricity, and neutrons, which have no electrical charges. Protons and neutrons both are nearly 2,000 times heavier than electrons.

Every one of the 92 atoms is made in the same pattern. Each one has a centre like the sun with electrons circling around it as the earth and other planets circle around the sun.

The atom's sun is made up of protons and neutrons. The particles in each atom are held together by electrical attraction. These forces of attraction are relatively tremendous.

They are so great that it is almost impossible to damage an atom of any kind.

Splitting or smashing an atom means an attempt to knock out some of its electrical, or non-electrical, particles. This splitting is done by directing rays of millions of volts in electrical energy against atoms as targets.

The rays usually are made of protons or neutrons. Sometimes X-rays are used, that is other electrons, or protons or neutrons. Sometimes X-rays will damage an atom.

Smashing an atom is a misnomer. Atoms are so tough that no atom has even been smashed by human means. The best that has been done is to knock a few of the particles out of an atom like chips.

Only one atom has ever been split. That atom is uranium 235. Uranium atoms when bombarded by the right kind of neutrons break into two nearly equal parts.

When uranium splits in two, some of the electrical attraction that held it together is given off in the form of electrical voltage. That voltage is the energy which makes the present atomic bomb.

HEAVY EXPORTER

During the period of the European war Canada's status rose to second place among world exporters. With about four-fifths of its foreign trade consisting of wartime commodities—finished materials and foodstuffs—its domestic exports in 1944 increased more than 27 1/2% in value over 1939, and combined exports and imports more than 300%.

Colored lenses in eyeglasses have been used since the middle of the 16th century.

## Firestone

THE ONLY SYNTHETIC RUBBER TIRES MADE THAT ARE  
SAFETY PROVED ON THE SPEEDWAY  
AT 100 MILES PER HOUR!

Imagine the punishment these tires took in this grueling, torturing test of tire safety and endurance as Wilbur Shaw, the famous race driver, under supervision of the American Automobile Association, averaged 100.34 miles per hour for 500 miles on the Indianapolis Speedway—equal to 50,000 miles of ordinary driving. Not a single skid or blowout occurred in the entire 500 miles—at speeds up to 135 miles an hour—definite proof that Firestone Synthetic rubber tires will stand up to any demand you can make of them! Remember this fact when you buy new tires.

## Canada's Northland

Arctic Considered One Of The Most Promising Areas On Continent

Dr. Ruth Gruber of Washington, field representative for the department of interior, said Canada would do well to encourage more people to live in her Arctic northland because it is one of the most promising areas on the continent.

Dr. Gruber will travel from Edmonton to Fairbanks by road and make a detailed report to Washington on the post-war possibilities of the north.

Canada is doing a good job in opening up its north country, Dr. Gruber said, but there is a definite need for a much larger population before the real possibilities of the country are in full use.

## Proper Food

Teaching Our People What To Eat, Is War Lesson

One of the lessons learned from the war was that great numbers of our people have been suffering from some form of malnutrition and because of this many young men who offered their services to the armed forces were rejected on account of some physical condition which made them unfit for war duty. Even in New Brunswick it was found that hundreds of our people, including many who were farm dwellers, had been lacking in enough of the right kind of food. Now it is hoped to change this by teaching them what to eat—Saint John Telegraph-Journal.
